Competent regulatory authority	Swiss Financial Market Supervisory Authority (FINMA)

This document was prepared on 2 August 2022.

You are about to purchase a Product that is not simple and may be difficult to understand.

What is the product?

Type: This Product is a common fund qualifying as an 'other fund for traditional investments' in accordance with the Swiss Federal Act on Collective Investment Schemes.

Objectives: The Subfund is actively managed. The investment objective is primarily to generate long-term capital growth by investing in an equity portfolio with a focus on Japanese companies. In this context, "Japanese companies" are deemed to include companies headquartered in Japan and companies headquartered in other countries which conduct their business activities mainly in Japan. As an alternative to direct investments, investments can also be made in derivative instruments which are directly or indirectly based on equities. The Subfund invests in equities and similar instruments (shares, dividend-right certificates, participation certificates, etc.), convertible and warrant bonds, index certificates and index baskets, and other derivative financial instruments. Investments in liquid money market instruments as well as demand or time deposits with banks are also permitted. Credit up to a maximum of 25% of the net assets may be taken out for both investment purposes and for paying out redemptions from the fund. The Subfund carries out distributions of income on a regular basis. Investors can subscribe or redeem units of the Subfund on every Swiss banking day. Recommendation: This collective investment scheme may not be suitable for investors who would like to withdraw their funds from the collective investment scheme within a period of less than three to five years. Investors are able to accept stronger fluctuations and a longer-term setback of the inventory value of the fund. The Subfund will bear the costs of standard brokerage and bank fees on securities transactions for the portfolio. These costs are not listed in the "Costs" section within this documentation. The minimum investment in this unit class is JPY 1,000,000.

Intended Retail Investor: This Product is intended for retail investors as well as institutional investors with sufficient knowledge and experience in collective investment schemes and similar products, an ability to bear an average investment loss, and a long-term investment horizon.

Term: This Product has no maturity date. The Subfund has been established for an indefinite period of time. The Management Company is entitled to liquidate, merge or reposition the Product at any time unilaterally in case the Product can no longer be managed in the interest of the investors. The amount the investor will receive upon early termination may be less than the amount invested.

What are the risks and what could I get in return?

(A) Summary Risk Indicator

The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. We have classified this Product as 4 out of 7, which is a medium risk class and poor market conditions could impact our capacity to pay you. **Be aware of currency risk** if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

(B) Performance Scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

Investment USD 10,000

Scenarios		1 year	4 years	7 years (Recommended holding period)
Stress scenario	What you might get back after costs Average return each year	USD 3,539 -64.61%	USD 3,801 -21.48%	USD 2,632 -17.36%
Unfavourable scenario	What you might get back after costs Average return each year	USD 8,277 -17.23%	USD 7,779 -6.09%	USD 7,994 -3.15%
Moderate scenario	What you might get back after costs Average return each year	USD 10,659 6.59%	USD 12,892 6.56%	USD 15,593 6.55%
Favourable scenario	What you might get back after costs Average return each year	USD 13,707 37.07%	USD 21,336 20.86%	USD 30,372 17.20%

This table shows the money you could get back over the next 7 years, under different scenarios, assuming that you invest USD 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other Products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the Product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Credit Suisse Funds AG is unable to pay out?

The investor of this Product will not face financial loss due to the default of Credit Suisse Funds AG, as the Subfund is considered to be a separate entity with segregated assets.

What are the costs?

Cost over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing, and incidental costs. The amounts shown here are the cumulative costs of the Product itself, for three different holding periods and in each case based on the moderate scenario set out in the performance scenarios. They include potential early exit penalties. The figures assume you invest USD 10,000. The figures are estimates and may change in the future.

The person selling you or advising you about this Product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Scenarios	If you cash in after 1 year	If you cash in after 4 years	If you cash in after 7 years (Recommended holding period)
Investment USD 10,000			
Total costs	USD 474	USD 2,033	USD 3,825
Impact on return (RIY) per year	4.74%	4.74%	4.74%

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	0.00%	The impact of the costs you pay when entering your investment.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.22%	The impact of the costs of buying and selling underlying instruments for the Product.
	Other ongoing costs	1.96%	The impact of the costs that we take each year for managing your investments.
Incidental costs	Performance fees	2.56%	The impact of the performance fee. We take these from your investment if the Product outperforms its benchmark.
	Carried interests	n/a	The impact of carried interests. Carried interests are not applicable for this Product.

How long should I hold it and can I take money out early?

Recommended holding period: 7 years

The recommended holding period is calculated based on the Summary Risk Indicator presented above. According to the investment objective as described above, the Product is designed for long-term investment. The Product is an open-ended Product. The investor can sell their investment on a daily (on business days) basis. No redemption fees or penalties will be charged at the level of the Product.

How can I complain?

Any complaint regarding the person advising on, or selling the Product can be submitted directly to that person or bank. Any complaint regarding the Product or this document can be submitted to the following address: Hérens Quality Asset Management AG, Bahnhofstrasse 3 , 8808 Pfäffikon. Investors shall note that a complaint can be also addressed by e-mail to info@hqam.ch.
